

Games

During our language week we played a lot of games. It was good for our logic and communication.

Sometimes it was very funny because we could not speak Slovak only English, and when we did not know words we had to help with our arms and legs =)

It started with the **tongue-twisters** and **proverbs**. It was for warming-up.

At first we played the **Category game**. This game was really good for our vocabulary. But sometimes it was quite difficult. Our teacher gave us the topic and we had to write 5 things of it but very quickly. We could have 50 points at alltogether.

Another game was the **Talking circle**. We were sitting in the circle and we had the topic and everybody had to talk about it for 3 minutes. For example we talked about our future, jobs, this school, etc...

We played **Snooping around**. We played with small counters and dice. There were cards with questions and we had to give true answers. If somebody did not answer, he had to go back to the start with his counter.

Our favourite game was **Tic-tac-toe**. It looked very simple but it was quite difficult. We made two teams. The first team chose a card with an answer and question but they could say just the answer and the second team had to guess the right question.

We liked it because it was better than just studying. We remembered the words better and easier.
